

## General production advice ware potatoes

- \* **Excellent Long Term Storage Characteristics**
- \* **Consistently High Dry Matter**
- \* **Good resistance to Stress**
- \* **Pallida Resistant**
- \* **Suitable to grow under varied climatic conditions and soil types**

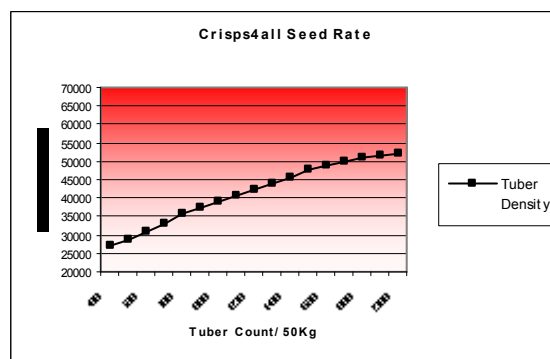

<b>Maturity</b>	<b>Maincrop</b>
<b>Tuber Size</b>	<b>Medium</b>
<b>Tuber shape</b>	<b>Round/oval</b>
<b>Numbers of Tubers</b>	<b>High</b>
<b>Flesh Colour</b>	<b>Light Yellow</b>
<b>Skin Colour</b>	<b>Yellow</b>
<b>Berries</b>	<b>Few</b>
<b>Dormancy</b>	<b>Average</b>
<b>Emergence</b>	<b>Normal</b>
<b>Sencorex Sensitivity</b>	<b>Pre Emergence only</b>
<b>Foliage Development</b>	<b>Good</b>
<b>Internal Bruising</b>	<b>Good resistance</b>
<b>Dry Matter</b>	<b>25.7%</b>

<b>Foliage Blight</b>	<b>4</b>
<b>Tuber Blight</b>	<b>3</b>
<b>Blackleg</b>	<b>4</b>
<b>Common Scab</b>	<b>3</b>
<b>Powdery Scab</b>	<b>4.5</b>

<b>Black Scurf</b>	<b>8</b>
<b>Dry Rot</b>	<b>5</b>
<b>Slugs</b>	<b>6</b>
<b>Internal Bruising</b>	<b>6 (1=Low, 20=Sensitive)</b>
<b>Little Potato Disorder</b>	<b>6</b>
<b>PCN R01,4</b>	<b>Resistant</b>
<b>PCN Pa2 Pa3</b>	<b>Resistant Pa2</b>

(1=Susceptible, 9=Resistant)

### Plant Population

**Click on density chart for full size**

### Fertiliser

**Crisps4all is a category 2 Nitrogen grouping. Apply N comparable to rates for Lady Rosetta. Recommend split applications with 2/3 at planting 1/3 at tuber initiation.**

## General production advice ware potatoes

### Pre-treatment and planting

Crisps4all has a medium dormancy and can be planted early, the seed will benefit from acclimatization and being planted with small white buds  
Tuber and or soil treatments are advised to control Rhizoctonia and other soil borne diseases.

### Growing attention points

Crisps4all is susceptible to common scab, manage the variety according to minimise potential scab issues.  
The variety emerges strongly with a high erect wiry plant.  
Crisps4all has a slight susceptibility to foliage and tuber blight, recommended the use of a robust blight programme

### Haulm killing and harvest

Crisps4all is a very stable and stress resistant variety, enabling dry matter and crop maturity to be achieved without any issues. Because of the potential for high dry matters, care must be taken to harvest the variety carefully because of a slight susceptibility to bruising.

### Storage

Crisps4all has very good storage characteristic enabling long term storage. Ensure the crop is dried as quickly as possible in store to prevent condensation from forming. These steps should help to alleviate any storage issues.
